25X1

1. The Dimitrovgrad antiaircraft unit is composed of approximately 600 soldiers divided into 12 antiaircraft batteries with a total of 48 heavy antiaircraft guns (four per battery), and eight antiaircraft machine guns. The heavy antiaircraft guns are either 75 mm. Soviet guns or 80 mm. guns.
2. The heavy antiaircraft guns are located as follows: 25X1
 - a. Two, at the eastern end of the Stalin Chemical Factory;
 - b. Four to six, near the entrances to the Stalin Chemical Factory and the Vŭlko Chervenkov Thermoelectric Plant;
 - c. An unknown number, at the southern end of the factory and plant area; and
 - d. The remainder, in a circle surrounding the entire area.
3. The antiaircraft machine guns are located as follows:
 - a. Six, on the highest buildings and towers of the Stalin Chemical Factory; and
 - b. Two, on the highest buildings of the Vŭlko Chervenkov Plant.
4. Allegedly a second ring of larger antiaircraft guns is located approximately five kilometers from the factory and plant sites.
5. The antiaircraft unit headquarters is located in the Tolbukhin section of Dimitrovgrad, and is commanded by an unidentified major. Commander of the garrison is an unidentified captain.
6. No regular training sessions are held in the antiaircraft unit. However, the soldiers spend a large portion of their free time in special discussion groups at meetings of the DSNM (Dimitrovski Sŭyuz na Narodna Mladesh; Dimitrov's Union of the People's Youth), and at special lectures on bacteriological warfare in Korea.²

7. A small building for housing the personnel servicing each battery, is located in the vicinity of every antiaircraft gun or group of guns. A guard is stationed on 24-hour duty at every large gun. All antiaircraft gun positions are linked by telephone with each other and with headquarters, where the aiming and fire control personnel are located. 25X1
